Our Vision

To be recognised as a leading electrical service provider in New South Wales, known for excellence, reliability, and innovation in delivering tailored electrical solutions that empower both residential and commercial clients.

Our Mission

1

Safe and Reliable Homes

We're committed to keeping Camden families safe and comfortable by delivering high-quality electrical work that meets the needs of every household.

2

Professional Service You Can Trust

Through clear communication, punctual call-outs, and respect for your home, we make electrical work stress-free for homeowners.

3

Built on Integrity and Care

Every job is carried out with honesty, accountability and workmanship that lasts, building long-term trust with local families.

Company Overview

Clemo Electric is a locally owned electrical business based in Camden, NSW, trusted by homeowners across the region. **With 52+ 5-star Google reviews**, we're known for reliable service, quality workmanship and fair pricing.

We understand that electrical issues are about more than just fixing faults, they're about keeping your home safe and comfortable. That's why we provide prompt call-outs, clear communication and upfront quotes, every time

As a fully licensed and insured local sparky, Lachlan handles everything from small repairs and safety checks to switchboard upgrades and lighting installations. No matter the job, he treats every home with care and respect.

When you call Clemo Electric, you're choosing a local sparky who values your home as much as you do.

Local Business Awards

We have been recognised as a finalist in the Camden Local Business Awards, an acknowledgment of our consistent commitment to excellence in electrical and solar services. This achievement reflects the trust our clients place in us and our dedication to delivering reliable, high-quality solutions for residential, commercial, and community projects. We remain focused on upholding these standards and look forward to providing the same level of professionalism, safety, and attention to detail on every project we undertake.

The Man Behind Clemo Electric

Lachlan Clements is the bloke behind Clemo Electric – a licensed sparky with a strong work ethic and a passion for delivering quality service. He first stepped into the electrical industry in 2018 as an apprentice, eager to learn the trade and determined to build a career based on reliability and trust.

In 2021, after completing his Certificate III in Electrotechnology at TAFE NSW and securing his electrical licence, Lachlan worked as a tradesman for two years with a local company. During this time, he built up solid hands-on experience across a wide range of residential and property maintenance jobs, earning a reputation for being thorough, professional and approachable.

By 2023, Lachlan decided it was time to branch out on his own and launched Clemo Electric, with the goal of offering Camden families an honest, dependable and down-to-earth service. He understands the importance of having a sparky who not only knows the job but also respects your home, turns up on time and communicates clearly.

With over 8 years of industry experience, a strong commitment to safety, and a genuine focus on getting the job done right the first time, Lachlan leads Clemo Electric with pride, professionalism and a personal touch that homeowners can count on.

Creating safe, inviting spaces around your home.

The CLEMO ELECTRIC Difference

Proudly Local, Camden Strong

Clemo Electric is based in Camden, NSW, with a strong presence across the surrounding suburbs. As a trusted local service provider, we're committed to fast response times and personalised electrical solutions, earning the confidence of homeowners, builders, and businesses alike.

Reliable Electrical Services for Every Setting

Whether it's an emergency repair, a home renovation, or ongoing commercial maintenance, Clemo Electric provides safe, compliant, and dependable electrical work. Our team understands that every client's needs are different, and we tailor each job to match your goals, budget, and timeframe—no shortcuts, just solid work.

Your Go-To Team for Residential and Commercial Projects

Clemo Electric is equipped to handle both large-scale commercial jobs and everyday residential work. From switchboard upgrades and fault-finding to new home wiring and shop fit-outs, our licensed electricians bring expert craftsmanship to every site, every time.

Lighting the Way with Smarter Solutions

We're committed to helping clients reduce energy usage without compromising on performance or design. We offer lighting upgrades, sensor installations, and advice on energy-efficient solutions to help you cut power bills and improve functionality.

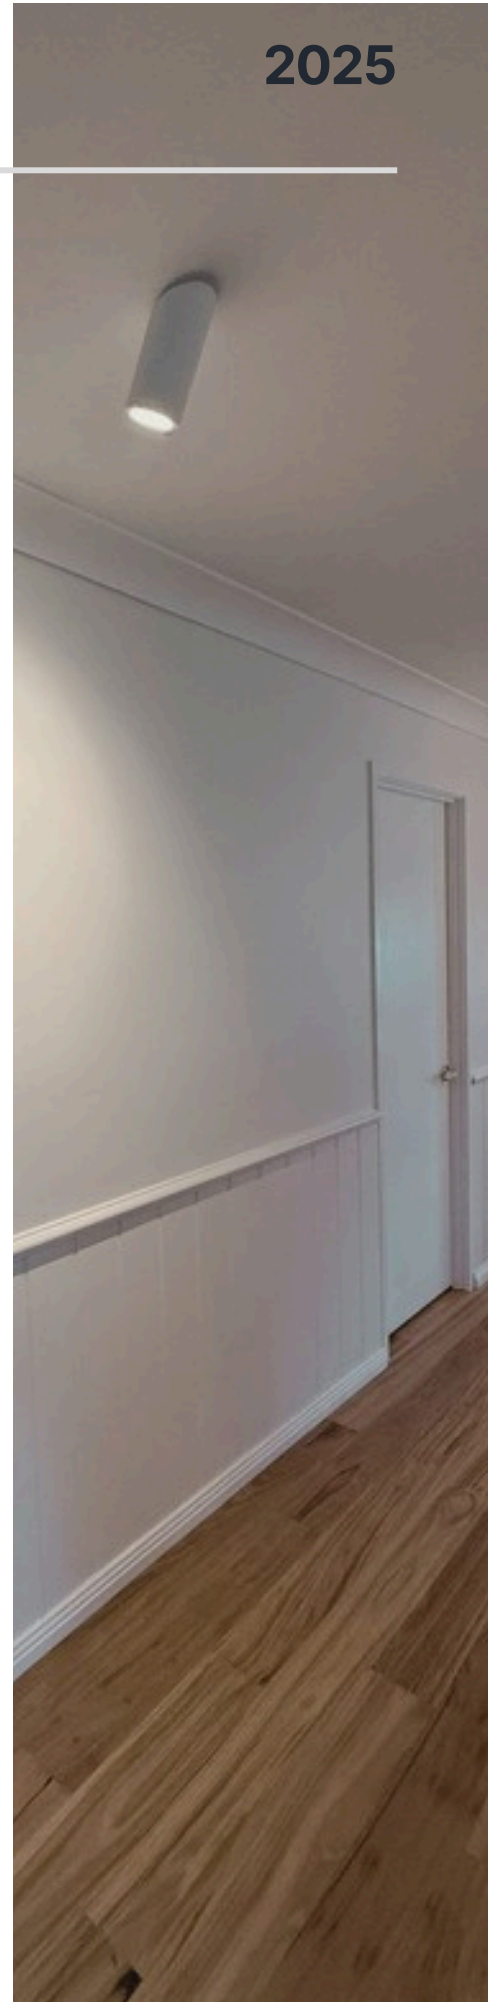

Emergency Support You Can Count On

Power issues can't wait—and with Clemo Electric, they don't have to. We offer prompt emergency services, backed by experience and the right tools to get your system up and running with minimal disruption.

Electrical Work You Can Trust

We're not just another electrician—we're your neighbours. Our reputation is built on transparency, quality, and long-term relationships. We're fully licensed and insured, and we stand behind every project with workmanship you can rely on.

We've Partnered With:

Our Projects

Electric Heater Installation – Pergola Area

Customised Installation for Optimal Performance

Understanding the importance of a reliable and efficient heating solution, we installed the electric heaters on dedicated circuits. This approach prevents overloading other power circuits in the home, ensuring safe and consistent operation. The heaters were positioned precisely to the client's specifications, guaranteeing optimal heat distribution throughout the pergola area.

Client Service

We maintained clear and consistent communication with the client throughout the project to ensure the best possible outcome. Our collaborative approach enabled us to meet their needs exactly, delivering a heating solution that enhances the comfort and usability of their outdoor space during the colder months.

Convenient and Flexible Operation

For added flexibility, the electric heaters were installed with individual switches. This feature allows the client to control each heater independently, using one or both as needed to maintain a comfortable temperature. It's a practical solution that supports energy efficiency and customised comfort.

Pool & Outdoor Lighting Upgrade – Grasmere Residence

Pool Lighting and Power

We installed a state-of-the-art pool lighting system that improves safety while creating a captivating ambience for evening swims. A reliable power supply was also fitted for the pool filter, ensuring uninterrupted operation and crystal-clear water.

Outdoor Uplights and Downlights

To showcase the outdoor landscape, we strategically positioned uplights and downlights. This not only enhanced the visual appeal of the space but also improved safety and functionality for the homeowners.

Pergola Lighting Integration

By adding subtle lighting fixtures within the pergola, we transformed it into a cosy and inviting outdoor living area. The seamless integration created a warm atmosphere, perfect for entertaining or relaxing under the stars.

Feature Wall Illumination

One of the highlights of this project was the feature wall lighting. Through careful fixture selection and placement, we were able to enhance the architectural detail, adding both depth and visual interest to the outdoor space.

Three-Phase Power Supply

To support the pool filter and other high-demand equipment, we installed a robust three-phase power supply. This ensures efficiency, reduces the risk of power disruptions, and provides the homeowner with dependable performance.

Testimonial ★★★★★

"We engaged Clemo Electric to wire up our outdoor area and pool recently. We found Lachlan very easy to deal with. He got the job done for us on time and budget. He was great at making suggestions for what would work well for our space and sourcing the products required. We would have no hesitation recommending his electrical services to others."

Tom S.

WHAT CLIENTS SAY

Residential Work

We tackled areas with poor airflow by installing high-efficiency fans, improving ventilation and helping prevent moisture build-up.

To boost both security and convenience, we fitted modern security cameras at the front and back of the home. These are easy to use and can be accessed remotely—giving the homeowners peace of mind wherever they are.

We also added motion-sensor lights in the pantry, garage, and front entry. These lights switch on automatically, making night-time movement safer and saving energy.

Testimonial:

“Lachlan did a fantastic job and we are very happy with the work he carried out at our house. He was always on time and left the house super clean when he left. We would highly recommend Clemo Electric to anyone needing electrical work.”
